

40GDAC High-Speed Cable

Overview

The ET6402-DAC-xM is a 1~5m short passive copper direct attach cable with one QSFP+ to one QSFP+ 40G connectors. The QSFP+ cable assemblies are high-performance, cost-effective I/O solutions for 40G Ethernet and 40G Fibre Channel applications. ☐☐ Note: This is a passive, unequalized DAC, which makes it more prone to signal integrity issues over longer distances or with professional hardware. ✓ Summary: Probably fine in some lab setups, but not a reliable option for enterprise-class hardware. MaxLink 40G QSFP+ DAC cable, passive is a fast and inexpensive solution for easy connection of two network active switch / router elements at 40Gbps without the need to purchase separate modules and other accessories (such as optical patch cables).
