

# Aircraft-grade fiber optic cable

## Overview

---

Aerospace-grade fiber optic cables that provide all the performance and benefits necessary to perform in the harsh environments of aerospace and military applications with low loss, tight bend radius, improved thermal stability, and peak performance during termination and. Higher bandwidth optical fibers in robust, space-saving constructions for next-gen systems, transmitting instant data and video at maximum capacity. Suitable For: Key Construction Details: Aerospace-grade fiber optic cables that provide all. Our high-speed contacts include Octonet, Quadrax, Split-Pair Quadrax, Differential Twinax, Twinax, Triax, and Coax Contacts. FlightLinx® PLUS Fiber Optic Cable designed for inflight entertainment, ethernet access, networking and display systems used in commercial aircraft. 8 mm ruggedized single jacket cable designed to meet or exceed ARINC 802 performance requirements without the.
