

Basic Requirements for Direct Burial Optical Cable Laying

Overview

Recommended technical requirements are detailed by reference to IEC 60794-3-11 on outdoor optical fibre cables for duct, directly buried, and lashed aerial applications. There are many requirements for laying direct-buried optical cables, and the direct-buried depth of optical cables is one of them. Cable may extend of the reel and become a safety hazard and/or damaging the cable. Defining Cable Routes and Access Points for Efficient Installation Define a clear cable route and access points while avoiding unnecessary detours and tight bends.
