

Botswana Long-Span Bridge

Overview

Kazungula Bridge is a road and rail bridge over the between the countries of and at the town of. Between the two traffic lanes and pedestrian footways there is a single railway line (although currently unconnected). The £208 million construction is helping to facilitate and speed up the delivery of essential goods travelling along a major transport and trade corridor. It runs through the desert-like interior of Botswana and flows into a river delta.
