

Can a 100Mbps router be used with a 200Mbps fiber optic connection

Overview

Try resetting both the ONT and the Router to default by pressing the reset button. I previously had an internet connection for 100Mbps, which my ISP recently upgraded to 200Mbps as part of the same plan. Some customers may report the speed is limited to 100 Mbps when connected to the TP-Link router, while the speed is much faster and can reach up to 500+ or 900+ Mbps when connecting to the ISP modem directly. Yes, you can often use your existing router with fiber optic internet, but there are crucial considerations.
