## Overview

---

An outdoor server rack is a weather-resistant, lockable enclosure designed to house 19-inch IT equipment—servers, switches, routers, power supplies, and environmental controllers—in exposed environments: utility poles, telecom cabinets, parking lots, construction sites, agricultural sensors, or. Premium HVAC outdoor telecom enclosures with NEMA 4/4X ratings for extreme environments. Our temperature-controlled electrical cabinets feature weatherproof, waterproof designs for 19" server racks, fiber distribution & cell tower equipment. Servers inside a data centre rack generate intense heat as they process growing volumes of data, and if that heat remains unmanaged, it can lead to system slowdowns, unplanned shutdowns, or lasting equipment damage.
