

Check the switch s PoE functionality

Overview

Many PoE switches have LED indicators that provide visual confirmation of PoE functionality. If the port is PoE enabled & connected to a PoE device, the LED next to the port will light up. To configure the inline power administrative mode on an interface, use the power inline Interface Configuration mode command. Shows Yes for ports enabled to support PoE (the default) and No for ports on which PoE is disabled. When you are planning to setup a cctv camera in your network, you may need a PoE switch.
