

Chilean Bridge Construction Costs

Overview

Construction of the bridge was scheduled to start in the second half of 2007 and completion was due in late 2012 at an approximate cost of 410 million. However, on 31 July 2006, the consortium in charge of the project revealed that the total cost of constructing the bridge was US\$930 million, which was above the limit of US\$607 million imposed by the government. In response, the ministry of Public Works decided not to continue with the project.
