

Core router connected to fiber optic cable has no internet access

Overview

Restarting your router, checking your modem connection, and resetting network settings often resolve the problem quickly. If your router shows it's connected but you can't access the internet, don't panic—this is a common issue with simple fixes. My ISP upgraded us to fiber into the home service (with a new fiber modem/gateway in bridge mode). Compatible router: Verify that your router supports fiber optic input (look for an SFP or WAN port labeled). The problem affects Windows PCs, Macs, iPhones, Android phones, and every other WiFi device equally.
