

# Croatian optical cable protection pipe

## Overview

---

This black, single-layer optical cable protection pipe system is made of PE80 polyethylene, it has a longitudinal groove of the inner surface, and is used to protect optical cables in the access and long distance network and optical and coaxial cables of RTV cable system and other. They can be used in all areas of general construction and civil engineering, in road construction and also in the construction of tunnels and tracks. was founded at the end of 1991 and started with activity at the beginning of 1992. We are authorized distributors of the world's leading companies in the cable, and cable installation equipment, tools, measurement. Reliable protection of optical, electrical and telecom cables In terms of installing fiber optic cable as well as electric power and telecom cables, it is necessary to further protect the cable from mechanical or any other influence.
