

# **Customization Process for New Integrated Energy Cabinets**

## Overview

---

This article will introduce in detail how to design an energy storage cabinet device, and focus on how to integrate key components such as PCS (power conversion system), EMS (energy management system), lithium battery, BMS (battery management system), STS (static. The article analyzes the core value of customized new energy cabinets from three. New Energy Storage Cabinet Customization Case: DEEPLINK Tackles Three Core Challenges When a new energy technology firm approached DEEPLINK, its core requirements were clear-cut: customize metal cabinets for a next-generation energy storage system, meeting three non-negotiable. Featuring lithium-ion batteries, integrated thermal management, and smart BMS technology, these cabinets are perfect for grid-tied, off-grid, and microgrid applications. Why Customizable ESS Enclosures Matter for Scaling and Installation Flexibility 1.
