

# **Data Center Terminal Power Distribution PDU**

## Overview

---

A power distribution unit (PDU) is a device for controlling electrical power in a data center. Data centers and other industrial environments cannot plug all their devices into one power supply. Instead, PDUs distribute power to multiple devices, including servers, computers, networking and storage devices, and tele.

## Data Center Terminal Power Distribution PDU

---

### **Smart PDU with 16-60A Current and 380-416VAC Power**

---

Intelligent Power Distribution Unit featuring built-in switch, 16-60A current, and 380-416VAC rated power for optimal power protection and management.

### **Heavy Duty SAF-D-Grid to 3 Terminals Copper Power Cable Cord**

---

Description Designed for data center, server rack and PDU power distribution Secure and reliable connection for high power environments Heavy-duty cable construction for continuous operation

## **What Is a PDU in Data Centers and Why Is It Important?**

---

A Power Distribution Unit (PDU) is a device that helps manage the flow of electricity within a data center. It takes power from a main supply and distributes it to equipment like servers, routers,
