

Does a whole-house fiber optic internet connection require a router

Overview

Yes, fiber internet requires specific equipment including an Optical Network Terminal (ONT) and a compatible router. The ONT converts fiber-optic light signals into electrical signals your devices can use. To distribute this high-speed internet throughout your home, you'll need Ethernet cables connecting the ONT to your router, and potentially from your router to stationary devices like desktop computers, smart TVs, or gaming consoles. After setup, the technician will check the fiber optic connection speed, ensure proper Wi-Fi coverage, and confirm that all.

Does a whole-house fiber optic internet connection require a router
