

# Does the temporary electrical distribution box at the construction site have a socket

## Overview

---

A site power distribution board is usually an electrical distribution box equipped with various sockets to provide power for different equipment and machinery. This guide covers BS 7375, BS 7671 Section 704, and everything electricians need to know about site electrics. Various power sources can supply temporary power, including: Generators: Portable and containerized generators come in various sizes and can offer a safe power supply on numerous sites. Unlike residential or industrial panels designed for long-term installations, these boards are built for mobility, durability, and flexibility.
