

Drilled hole distribution box cover plate

Overview

Each plate includes four 60mm diameter lifting holes, positioned 50mm from the plate edge, facilitating easy deployment using standard lifting gear. 6 mm (19") wall-mounted network distributors EL, optionally gland plates with brush strip or for metric cable glands. Gland Plates provide a designated and organized point for cables to enter and exit an enclosure, allowing for secure connections. Insert into holes in pipe, containers, panels, and parts to keep out debris Protect just about anything, including pipe, flanges, screws, and posts Protect wire, cable, and cords from holes with sharp or rough edges The most versatile system, attach fittings along the continuous slots to build. A general-purpose panel (drillable type) is a board panel into which holes can be drilled.

Drilled hole distribution box cover plate
