

Dun an New Energy Data Center

Dun an New Energy Data Center

How DNV's Energy Transition Outlook 2025 impacts data centres.

Just finished going through the latest Energy Transition Outlook from DNV, and while it's a global energy forecast, there's a lot in there that's directly relevant to those of us working in and

Kevin O'Leary details massive Utah data center to compete with

Kevin O'Leary offered details behind a massive new Utah data center project, saying it will help the U.S. defeat China in the escalating AI race.

Is Using Green Energy to Power Data Centers a

In late 2024, the city received a proposal from Donato Solar of Deerfield, Illinois, and its affiliate, Gail Technology, to construct a solar farm and

Data Centers and Renewable Energy -- Assuring the Future of Data

The trick was that the cheap, abundant, renewable energy was just too attractive for a much more profitable outlet -- data centers. Project Bison was simply outcompeted.

NextEra sees renewables demand tripling as data

NextEra Energy expects demand for new renewables power to triple over the next seven years to meet quickly rising electricity demand from

The Truth About Renewable Energy in Data Centers

Many data center operators claim full renewable coverage, but most rely on energy credits and offsets. Learn about renewable energy in data centers.

Green Energy's Role In A World Where AI Data Centers Are

Renewables are essential, and their ability to support AI and data center growth is improving due to advancements in energy storage, grid intelligence, and demand-side innovation.

US data centers' energy use amid the artificial

Data centers accounted for 4% of total U.S. electricity use in 2024. Their energy demand is expected to more than double by 2030.

New AI data center in Utah will generate and consume more than

Tech Industry New AI data center in Utah will generate and consume more than twice the amount of power the entire state uses -- Kevin O'Leary's 9 Gigawatt Utah data center campus

Scaling Nuclear Energy to Power AI Data Centers: What

GREEN INNOVATION Scaling Nuclear Energy to Power AI Data Centers: What it Will Take
A Deloitte analysis indicates that new nuclear power

Nearly 50,000 Lake Tahoe residents have to find a new power source

Roughly 49,000 Lake Tahoe residents could lose 75% of their power after their energy provider said it's directing energy to neighboring data centers.

Data center sustainability , Deloitte insights

AI-driven data center power consumption will continue to surge, but data centers are not--in fact--that big a part of global energy demand. Deloitte predicts data

How Data Centers Redefined Energy and Power in 2025

In 2025, AI demand drove data centers toward on-site power, BESS, and nuclear options, while grid delays increased. Here are the top trends that

Zhejiang Dun'an New Energy Development Co., Ltd.

Find company research, competitor information, contact details & financial data for Zhejiang Dun'an New Energy Development Co., Ltd. of Hangzhou, Zhejiang. Get the latest business insights from Dun &

Data centres & networks

As the world becomes increasingly digitalised, data centres and data transmission networks are emerging as an important source of energy demand.

Power Hungry Data Centers Are Driving Green Energy

In response, operators are piloting the co-location of data centers and large renewable energy power plants to reduce grid reliance and access cheaper

Power Hungry Data Centers Are Driving Green Energy Demand

In response, operators are piloting the co-location of data centers and large renewable energy power plants to reduce grid reliance and access cheaper cleaner energy.

Understanding renewable energy use in data centres

As overviewed, entering Power Purchase Agreements enables operators to align their goals with the energy industry's. They can go further by

Deep Green taps Zendo Energy for Manchester data center

The partnership's first project will be at Deep Green's flagship data center in Urmston, Greater Manchester, with Zendo procuring a clean energy supply contract to power the 400kW site.

How much of the AI data center boom will be powered

According to a new report from the International Energy Agency, the world will spend \$580 billion on data centers this year -- \$40 billion more than will

How data centres can avoid doubling their energy use

Data centres consume immense energy but leading facilities use around 84% less than the norm; however, sustainability efforts must be holistic

Advantages and Challenges of Nuclear-Powered Data

We are living in the data center revolution. Nearly everything in our lives is now linked to the vast architecture of information crisscrossing the planet, including

Meeting the energy needs of Data Centres: What role for cogeneration?

Energy supply is the key consideration for data centre operators, specifically in relation to selecting sites to build new data centres. Long waiting times for grid connections and

sufficient supply to be

Data centre electricity use surged in 2025, even with tightening

Data centre electricity use surged in 2025, even with tightening bottlenecks driving a scramble for solutions - News from the International Energy Agency

Designing and regulating clean energy data centres

Data centres are causing an increase in global energy demands. To prevent this new energy demand increasing CO₂ emissions, data centres need

Data Center Energy Needs Could Upend Power Grids

Hyperscale data centers are massive IT and CPU warehouses that facilitate large-scale cloud computing. They have grown exponentially in the past

Data centers and AI: How the energy sector can meet

The growth of data centers and AI rely on the availability of electric power. Opportunities for investors in power infrastructure and adjacent sectors
