

E3x-zd fiber optic sensor

Overview

The OMRON E3X-ZD digital optical fiber sensor offers a reliable solution to these common challenges. 8-turn sensitivity with position indicator IP66 enclosure rating Slim body mounts on DIN rail Set-mode blinking light source aids alignment Use E32-series fiber-optic cables. E3JM-10M4 detection methods: the firing pattern, Detection range: 10m OMRON E3X-ZD11 2M. The figure on the right is a comparison between the buttons of E3X-ZD, the new version, and of the old version. A new fiber amplifier unit able to detect the "presence or absence" of workpieces with "solid stability" at a "Cost-effective price" is now available. New technologies and efficient design allow cost reduction in manufacturing process.
