

Features of Peruvian Distribution Boxes

Overview

They consist of a rigid enclosure housing busbars, circuit breakers, fuses, and wiring terminals. The design emphasizes safety, enabling easy access for maintenance while preventing accidental contact with live electrical parts through secure covers and lockable doors. There is a total consensus about the necessity to reform the regulation according to this new reality, redefining the role of distribution companies in this new paradigm. These latter must become active Distribution System Operators (DSOs), they will have to. In addition, it shall be properly designed for one single-phase or three-phase input and provision for 4 three-phase or 12 single-phase outputs.
