

Fiber Optic Cable Pricing for Smart Buildings

Overview

Fiber-optic cable materials typically cost \$1 to \$6 per linear foot, depending on fiber count and cable type. Commercial building installations with 100-200 network drops generally range from \$15,000 to \$30,000. Single-mode fiber costs less per foot than multimode fiber, but it requires more. Main cost drivers include cable grade (indoor vs outdoor, armoured), distance, and labor for trenching, splicing, and termination. Whether you're planning a national fiber rollout or sourcing cables for enterprise infrastructure, understanding how fiber optic cable pricing works can help you budget more effectively and make better.
