

# **Fiber Optic Fusion Splicer Cable Fusion Splicer**

## Overview

---

Fusion splicers are essential for creating low-loss, high-performance fiber optic connections in telecom, FTTH, and data center applications. The best splicers offer core alignment, fast splice times, durable designs, and smart features like cloud syncing and automated calibration. In Japan, we hold Fiber optic training where participants can systematically acquire knowledge and skills necessary for using fusion splicer, tools, and performing splicing work. With the advent of 5G, along with its associated increase in bandwidth capacity, there are optimistic signs of growth in industry forecasts. An Optical Fiber Fusion Splicer is a high-tech machine that uses heat to melt (or "fuse") the ends of two optical fibers together.
