

Fiber Optic Fusion Splicer Splitter

Overview

Fusion splicer enable splicing of Fiber Optic Cable with low loss and high reliability. For fusion splicer, we offer two types: Core alignment fusion splicer, which bring high performance and functionality, and Cladding alignment fusion splicer, which are superior in portability. To create splices with high optical quality and mechanical strength, these tools perform a series of tasks, including stripping, cleaning, cleaving, splicing, recoating, and. In Japan, we hold Fiber optic training where participants can systematically acquire knowledge and skills necessary for using fusion splicer, tools, and performing splicing work.
