

# Fiber optic cable pre-laying cost

## Overview

---

A practical frame is \$40,000–\$350,000 per km, with a common mid-range around \$120,000–\$180,000 per km for standard single-mode fibre in ducted runs. Per-unit considerations include \$/km for total project, \$/duct meter for ducting work, and \$/splice for termination. Commercial building installations with 100-200 network drops generally range from \$15,000 to \$30,000. Buyers typically pay for fiber laying by combining material costs, labor time, and permitting plus trenching or aerial support fees. Fiber optic cables consist of multiple fibers, each designed for high-speed data transmission.
