

# **Fibre Channel Hard Drive Interface**

## Overview

---

Fibre Channel is standardized in the of the International Committee for Information Technology Standards (), an (ANSI)-accredited standards committee. Using optical fiber to connect devices, fibre channel supports full-duplex data transfer rates up to 100 MB per second. Fibre Channel hard disk drives (FC HDDs) are a type of server hard drive that uses the Fibre Channel interface to communicate with the host server. I have a question is it possible to use a Fiber channel hard disk with a SATA or IDE port?

How could I accomplish this if its possible?

@Don lets step back for a moment and revisit, do you actually have the FC drives and if so how many, what size capacity, form factor (3.
