

Function of China Unicom 24-core fiber distribution box

Overview

24 Core Fiber Optic Distribution Box, This series is applicable to the FTTx project and provide mechanical protection for a fiber management system that includes the functions of splicing, patching, and passive component integration. With a sturdy casing suitable for indoor and outdoor use, it simplifies installation and maintenance through clear labeling. Product Description: Generally, the ODF unit is a necessary part of the indoor optical distribution frame.
