

# **How much does 24-core multimode fiber optic cable installation cost**

## Overview

---

Fiber optic cable installation costs between \$1,500 and \$7,000 for your home, with prices varying by cable length and installation method. The installation type you choose and the layout of your property determine the total labor and materials needed for your project. Single-mode fiber costs less per foot than multimode fiber, but it requires more. This guide compares multimode cable prices across OM1-OM5 and explains what really moves the number: fiber grade, fiber count, jacket rating, and whether assemblies are factory-terminated.
