

How much does a 24-core optical cable cost from manufacturers

Overview

In practical terms, the current market range for a standard single-mode 24 core fiber optic cable typically falls between \$1. Fiber-optic cable materials typically cost \$1 to \$6 per linear foot, depending on fiber count and cable type. Commercial building installations with 100-200 network drops generally range from \$15,000 to \$30,000. Single-mode fiber costs less per foot than multimode fiber, but it requires more. The optical fiber elements are typically individually coated with layers and contained in a protective tube suitable for the environment where the cable will be deployed.
