

How much does a multimode optical fiber cost

Overview

Fiber-optic cable materials typically cost \$1 to \$6 per linear foot, depending on fiber count and cable type. Commercial building installations with 100-200 network drops generally range from \$15,000 to \$30,000. Single-mode fiber costs less per foot than multimode fiber, but it requires more. We outline typical ranges for bare cable versus jumpers, note common mistakes when budgeting, and provide a. Here's a general pricing reference: These are indicative prices based on standard configurations.
