

# **How much does it cost to splice fiber optic cables in El Salvador**

## Overview

---

00 per ft depending on terrain, access, and required precision for termination. Fiber optic splicing costs vary widely depending on project size, location, fiber type, and site conditions. I usually bill T&M, but it works out to about \$175-250 for setup/teardown per site and \$4-7 per fiber for prep in a new tray in an existing case and splicing depending on if it's flooded or dry cable. Add another \$50-75 to prep a new case endspan or \$100-150 for a new case midspan with overcut on. Commercial building installations with 100-200 network drops generally range from \$15,000 to \$30,000. Single-mode fiber costs less per foot than multimode fiber, but it requires more.
