

# How to check fiber optic network on a gigabit router

## Overview

---

Many fiber optic modems and routers provide built-in diagnostic tools to check the connection speed directly from the device. Steps: Open your browser and access the router's IP address (usually found in the user. I know that "show cable-diag tdr int [slot/port]" command can check 10/100/1000 ethernet link. Test your high-speed internet connection with advanced multi-connection testing Why is my gigabit speed test showing lower speeds?

Several factors can affect your speed test results: network congestion, WiFi limitations, outdated equipment, or ISP throttling. Use a Speed Test Tool  
Online Speed Test Websites: Many websites allow you to test your connection.
