

How to connect the grounding bolt of the distribution box

Overview

Attach a ground wire from one of the threaded studs (A) at the bottom of the housing, to the mounting plate (B). 26 mm² (10 AWG) ground wire must be used, and in all other markets a 6 mm² must be used. When inspecting the interior of a stainless steel outdoor electrical box distribution box, pay attention to the copper or tin-plated terminals on the base plate or side walls. These locations are usually marked with grounding symbols for easy cable crimping. Preparation: First, you need to prepare some necessary tools, including grounding wire, grounding rod, voltmeter, insulating gloves and insulating tools. Without this connection, a fault could energize the box itself, turning a seemingly harmless component into a serious danger.
