

How to place the signal in the fiber optic terminal box

Overview

Here is a brief instruction on how to set up an IP camera with the FTB from Fastcabling: 1) set up the data and power connection between the FTBs on both sides; 2) connect the router with the media converter; 3) use a pre-terminated fiber cable to connect the converter and. It is used in a terminal box to connect the optical fibers in the optical cable, and to connect the optical cable and the jumper through the terminal box coupler (adapter). Jumper Both ends of the jumper are movable connectors, which connect the pigtail and the device. To establish easy and safe installation put the box where it will be installed and measure the required length of the cable. A fiber optic junction box, also known as a fiber optic distribution box or termination box, is a protective enclosure that facilitates the connection and management of fiber optic cables.
