

# How to set up an optical port router fiber optic transceiver

## Overview

---

To set up your router for fiber internet quickly, connect the router to your fiber modem, access the router's settings via a web browser, and input the provided ISP credentials. This comprehensive guide combines industry standards with field-tested practices to ensure you achieve a rock-solid. This section describes how to install optical transceivers on the SFP or SFP+ ports and connect them to the ports of the peer device using optical fibers according to the network plan. Make sure to update the firmware, configure Wi-Fi security, and customize your network name for optimal performance.
