

# How to use a commercial fiber optic router

## Overview

---

To set up your router for fiber internet quickly, connect the router to your fiber modem, access the router's settings via a web browser, and input the provided ISP credentials. Fiber transmits data using light signals through glass strands, delivering faster speeds and lower latency than cable or DSL connections that rely on. Inside your office, we use your existing coaxial cable wiring for Fios TV, making installation easy. Make sure to update the firmware, configure Wi-Fi security, and customize your network name for optimal performance. This comprehensive guide combines industry standards with field-tested practices to ensure you achieve a rock-solid.
