

# **Increase the height of the distribution box bracket**

## Overview

---

Mounting bracket is a flexible structure, which makes it easy to adjust or replace the electrical components. All the components, wires and connections are under the protective cover due to the same height. According to standards, the height from the bottom edge of a distribution box to the floor is generally 1. While the internal rail height is often fixed, external positioning requires strategic planning to meet safety standards and site-specific drainage needs.
