

Installation location of integrated power module

Overview

The IAM power module must be positioned in the leftmost slot of the power rail. The Kinetix® 6200 or Kinetix 6500 modular drives consist of an integrated axis (IAM) power module and up to seven axis (AM) power modules each coupled with a Kinetix 6200 or Kinetix 6500 control module. Accessories

This includes the integrated components, such as IGBTs or gate driver IC as well as the design of the necessary external. Power interface modules (PIMs) provide the following: TeSys avatars that include power devices can provide full-load energy monitoring when a voltage interface module is installed on the TeSys island.
