

Intel 82599 compatible gigabit optical module

Overview

□ Dual port 10 GbE device or Single Port device (82599EN) □ Serial Flash Interface □ 4-wire SPI EEPROM Interface □ Configurable LED operation for software or OEM customization of LED displays □ Protected EEPROM space for private configuration □ Device disable capability □ Package. Supermicro® Super I/O Modules provide flexible I/O networking options and the AOC-MTGN-i2S is the most flexible and scalable 10GbE SFP+ SIOM controller for today's demanding data center environments. 0 Networking Cards with SFP+ pluggable transceivers, which incorporate the Intel 82599 10GbE Controller deliver outstanding performance in virtualized environments for network intensive applications requiring higher I/O bandwidth. It also greatly reduces CPU processing on FCoE receive traffic by eliminat-ing a data copy.
