

Intelligent Integrated Power Switch for Linear Lights

Intelligent Integrated Power Switch for Linear Lights

Intelligent Power Switches

Enhance safety and stability in body, lighting, and heater applications with our diverse series: high-current control, stable safety, and motorcycle self-excited

Linear LED Drivers , NCL31000

The NCL31000 is an intelligent LED driver targeting luminaire applications, including capabilities for Visible Light Communication and Indoor Positioning. The NCL31000 incorporates a high efficiency

SMART SYSTEM

Thanks to its wireless and bluetooth technology, SMART system offers endless possibilities of installation without the need for further milling operations. Gateway

Intelligent Power Switches (IPS)

Integration ST offers an industrial series of intelligent power switches (IPS) for high-side and low-side configurations. An IPS integrates a control part (logic interface, drivers, and protection) with a power

High-Efficiency AC-DC TV Power Solutions: An Intelligent LED

This document introduces several innovative topologies for LED backlight TV with two power reference designs (the PMP4298 and PMP4298A) using the TLC5960, an eight-channel, intelligent linear LED

LED Linear

LED Linear(TM) supplies high quality linear LED lighting solutions based on flexible printed circuit boards worldwide. Our offer is a cost effective, unique modular LED tool kit for interior or exterior linear

Lighting Control

Intelligent Distribution refers to advanced electrical distribution systems that integrate digital technologies to optimize the management, monitoring, and control of power distribution in various

Intelligent Power Supply Design Solutions

Intelligent Power Supply Solutions Today, power supply designers must create power conversion products that offer greater efficiency, higher power density, higher reliability, advanced

Integrated Lighting Controls

New software applications, combined with wired and wireless technology, allow lighting controls to "address" an individual fixture--to set illumination levels, make power adjustments and provide

Intelligent Lighting Controls

Intelligent Lighting Controls lets you transform your environment with smart, energy-saving lighting solutions. Talk to a representative today!

Intelligent Integrated Fixture Control System

Intellect-enabled fixtures that include both an embedded Intellect Linear Power Control Module and embedded Intellect Sensor Head provide a simple out-of-the-box wireless solution.

LightLEEDer Programmable Lighting Control , Intelligent

Switching Inputs accepts virtually any type of switch, momentary or maintained, 2- or 3-wire switch and directly powers motion sensors, data line switches and devices.

What is intelligent dimming? How to achieve intelligent dimming of

3. Intelligent control strategy The core of an intelligent dimming system lies in environmental perception and decision-making algorithms: Environmental perception layer:

Smart power switches

A smart power switch is a high-performance power MOSFET switch that controls electrical circuits while offering intelligent protection, load control, and diagnosis

ABB launches Busch-art linear light switch range - KNXtoday

The innovative Busch-art linear® range of mechanical and electronic switches can be integrated into ABB's smart home system ABB-free@home®. By combining all the useful functions of

Smart lighting & controls

Smart lighting or connected lighting has been a rapidly growing market for many years. Driven by progressive miniaturization, simplification and plenty of integration options, there is rarely a

Adjustable Current Limit of Smart Power Switches (Rev. B)

Smart Power Switches from Texas Instruments are robust automotive-grade power switches with a wide range of on-resistances and channel count configurations. The devices offer protection against short

Integrated Fixture Control Solutions , Leviton

Leviton Integrated Fixture Mount/In-Fixture Controls offer a complete end-to-end professional lighting and wireless control solution.

Total Integrated Power Solution for Smart Lighting

The smart lighting devices can be used as a hub, integrated as key component of IoT systems and smart home/smart automation networks¹. This article will focus on

LED driver ICs

The high level of integration reduces the need for external components. Besides a broad analog LED controller IC portfolio, Infineon's XDP(TM) LED Lighting portfolio

Built-in Intelligent Control LED Linear Lights

Built-in Intelligent Control LED Linear Lights LED linear lights feature rectangular lighting patterns and specially designed lens that perfectly match warehouse aisles while providing soft and low-glare light.

LM3466 Smart Linear LED Driver for Multi-Channel LED Systems

A multi-string LED array can be built in minutes using an off-the-shelf constant current AC/DC power supply, just one LM3466, and a few passive components per string.

Lighting Control

ABB offers a comprehensive range of power converters and controllers designed for various applications across different industries. These products help customers generate and utilize energy efficiently,

Making every light switch intelligent in a simple way

The Switch Module for brand switches makes existing light switches part of the Homematic IP Smart Home. The flush-mounted solution can be

The Best Smart Light Switches of 2024

Smart light switches are a great way to control multiple lights in your home with voice assistants and apps---without needing to replace your bulbs.

LED Drivers for Lighting Control Applications , DigiKey

ROHM Semiconductor LED driver solutions for lighting control applications ROHM Semiconductor has highly-integrated LED driver solutions for

Connected and smart LED lighting for IoT

Smart, energy-efficient, and cost-effective connected LED lighting systems beyond lighting controls with sensors and Bluetooth® for IoT applications.

Smart Lighting

PowerIntegrations offers a range of integrated high-voltage ICs to power Smart Lighting applications. These ICs work with various communication protocols from
