

Internet Energy Innovation Lab

Internet Energy Innovation Lab

Centre for innovations for the energy transition: the Future Energy Lab

Using the lab as a network, some fifty companies are exploring digital solutions based on technologies like blockchain and artificial intelligence with a view to creating a climate-friendly energy sector.

Intelligent Energy Systems

The group "Energy Technologies" investigates and optimizes intelligent and decentralized energy systems like fuel cells and redox-flow batteries for the energy and transportation domains.

e-Lab: Electricity Innovation Lab

Within the energy sector, e-Lab brings practitioners together to solve key problems at the frontier of the energy transition, creates trust, and accelerates the pace at

A living lab from dena, striving to shape the digital future

The Future Energy Lab brings together players from the digital and energy sectors to carry out testing on digital energy and climate protection technologies.

Creation of an Internet of Things (IoT)-Based Innovation Lab

Creation of an Internet of Things (IoT)-based Innovation Lab Introduction Internet of

Things (IoT) technology has transformed almost every industry sector, including but not limited to energy,

The State of Energy Innovation 2025 - Analysis

Global energy innovation is evolving rapidly, shaped by technological advances, increased public and private investment, and a shifting international

Energy Innovation Hub - Transitioning to Renewable

EnergyInnovationLabsupportsboldthinkerssolvingurgentenergychallenges.Through hands-on support, market validation, and deep connections, we help

Green Energy Lab

Das Green Energy Lab ist eine österreichische Forschungsinitiative für nachhaltige Energielösungen, insbesondere im Bereich der Strom- und

2026 Incubatenergy® Labs Challenge: Home

EPRI's Incubatenergy Labs® (IEL) connects utilities with promising early-stage startups to accelerate innovation in the energy sector. Through a collaborative

The State of Energy Innovation 2026 - Analysis

The second edition of The State of Energy Innovation turns the spotlight on the technologies, policies and funders at the forefront of energy

Green Energy Lab

We are the point of contact for all companies and institutions that contribute to the energy transition with innovative ideas. We use the solutions

Innovation and Entrepreneurship Center , NLR

Accelerating Energy Innovation Through Connection In 2025, IEC expanded its reach, supporting startups and industry leaders in accelerating advanced energy technologies from lab to market

IGC, LSE and Tata Power launch innovation lab to

The Energy Insights & Innovation Lab is designed to harness cutting-edge research, data and experimentation to support India's transition to clean

Startseite

Das Future Energy Lab geht wieder auf die Suche nach digitalen Energie- und Klimatechnologien mit echtem Impact. Jetzt innovative Lösungen einreichen und die Energiewende aktiv mitgestalten.

Energy Insights and Innovation Lab (EIL): open call for research ideas

Energy Insights and Innovation Lab (EIL) advances research on affordable, reliable power and integration of renewable energy.

Behind the Breakthroughs: Inside the GEIC Energy Lab

Whether you're building the next high-performance EV battery, designing grid-scale storage, or rethinking the way your sector approaches

Analog , Embedded processing , Semiconductor company , TI

Texas Instruments has been making progress possible for decades. We are a global semiconductor company that designs, manufactures, tests and sells analog and embedded processing chips.

Energy Insights and Innovation Lab (EIL): open call for research ideas

Based in Mumbai, EIL supports applied, policy-relevant research on how utilities can

manage rising electricity demand while improving affordability, reliability, and integration of
