

# Is fiber optic cable more expensive or high-pair cable more expensive

## Overview

---

**Material Costs:** Fiber optic cables are more expensive, primarily because of their advanced design and high-performance capabilities. Commercial building installations with 100-200 network drops generally range from \$15,000 to \$30,000. Single-mode fiber costs less per foot than multimode fiber, but it requires more. And between the different types of fiber cables (drop fiber optic cables, outdoor fiber optic cables, indoor fiber optic cables, special fibre cables, etc.
