

# **Is the Ic connector for optical modules**

## Overview

---

Most SFP fiber optic modules use LC connectors, while SC connectors are mainly found in legacy networks and MPO/MTP connectors are used for high-density cabling rather than directly on standard SFP modules. This connector landscape reflects how modern SFP deployments prioritize port density and. Small Form-factor Pluggable (SFP) modules, which connect network devices like switches, routers, and servers to fiber optic cable connector, have become a standard component in modern networks. The "SC" in its name is taken from the abbreviation of Square Connector, indicating that its shell shape is rectangular. You may find LC connector has a strong family which includes but not limited to LC optical fiber connectors, LC fiber patch cables, LC fiber.
