

Offshore Edge Data Center Armor

Offshore Edge Data Center Armor

Aker BP to deploy Armada Edge data center on Norwegian oil rig

Oil company Aker BP is to deploy a containerized Edge data center on an oil rig. Edge data center firm Armada this week announced an agreement with Aker BP to deploy Armada's

Aker BP and Armada bring offshore modular data center to Norwegian

Norway's oil and gas player Aker BP and Armada, a full-stack edge infrastructure company, have joined forces to use an offshore modular data center at the drilling arena on the

Offshore Modular Data Center Deployed on Norwegian Continental

Aker BP deploys an offshore modular data center with Armada to process data locally on drilling rigs, enhancing AI-driven predictions, cybersecurity, and operational efficiency on the

Containerized Edge data center firm Armada takes part

Containerized Edge data center provider Armada has taken part in the US Navy's UNITAS 2025 exercise. The US Navy used the company's

Aker BP taps Armada for offshore modular AI data center to process

Aker BP partners with Armada to deploy offshore modular AI data center for edge processing of drilling data, improving uptime, resilience and remote operations.

Edge Computing, Redefined , Armada Galleon

Designed as modular, containerized data centers, Galleons are built to thrive in challenging environments, ensuring your operations remain efficient and

Aker BP taps Armada for offshore modular AI data center to process

Via EdgeIR Oil company Aker BP is collaborating with edge AI infrastructure solutions provider Armada to deliver a modular data center for offshore drilling on the Norwegian

Aker BP and Armada Announce Agreement to Deploy Offshore

Under the agreement, Armada will deliver a Galleon designed to operate in offshore conditions, enabling local processing and analysis of drilling and operational data directly on the rig.

Navigating Cybersecurity in Edge Computing:

In this blog, we'll explore how edge computing enhances efficiency in offshore oil and gas operations while introducing cybersecurity challenges like

Aker BP's modular data center will operate offshore

Aker BP and Armada have signed a strategic agreement to install a Galleon modular

data center on an offshore drilling rig on the Norwegian continental shelf, with the aim of processing

Aker BP and Armada bring offshore modular data center to Norwegian

Aker BP and Armada have joined forces to use an offshore modular data center at the drilling arena on the Norwegian Continental Shelf (NCS).

U.S. Navy deploys Armada's mobile edge data center

Armada delivers Galleon mobile edge data center to U.S. Navy, enhancing tactical operations with advanced network, compute & AI for mission

Armada Expands Offshore Edge Footprint With Aker BP Galleon

New updates have been reported about Armada. Armada has signed an agreement with Aker BP to deploy its Galleon modular data center on an offshore rig on the Norwegian Continental

Aker BP to install an Armada offshore modular data center in Norway

Aker BP, a European oil company, under a new agreement with Armada, an edge infrastructure company, will install a modular data center on an offshore drilling rig, aiming to process

North Sea Pathways: Digital Oilfields to Ultra-Secure

To maximize the value of all the data collected from offshore assets, broadband and mobile LTE connectivity must be provided via modern submarine

Edge Mission Critical Systems Modular Data Center

Rugged enclosure proven to withstand the elements Best for edge networks, harsh environments, remote ops Outperforms the competition by design (not a glorified

Northstar Enterprise + Defense Expands Leadership in

Northstar Enterprise + Defense, a wholly owned subsidiary of Northstar Technologies Group, Inc., is a premier provider of modular, AI

Enterprise Data Centre Provider Strengthens Cybersecurity

How Armor MDR helped Colt DCS strengthen cybersecurity and threat detection across 16 enterprise data centres in Europe and Asia Pacific.

Aker BP, Armada to deploy offshore modular data center for AI-driven

(WO) - Aker BP and Armada have agreed to deploy a modular offshore data center on the Norwegian Continental Shelf, aimed at enabling real-time processing of drilling and operational

Edge computing: The latest innovation in the oil and gas

Applications in the oil and gas industry The oil and gas industry operates in some of the world's most challenging environments, from offshore

Armada partners with Tampnet to deploy compute racks

Armada has partnered with offshore-focused communications firm Tampnet to provide Edge compute to oil rigs in the Gulf of Mexico. Tampnet and

Securing Edge Data Centers: Challenges and Solutions

Here's why edge data center security can be challenging, and what data center operators can do to mitigate the risks.

The Watery Edge: Microsoft Deploys Undersea Servers

Microsoft has deployed the second phase of its undersea data center prototype in the waters off of Scotland. The project represents a radical new
