

Optical distribution box maximum

Overview

The main function of this product is to provide mid-span + branch for various types of branch cables in optical transmission links, and to provide protection functions by splitting and wiring. The Telegärtner ODB 54 wall distributor enables you to solve various installation demands with one product. Whether it will be used as splice storage or as distributor housing, there is enough space in the rugged plastic ODB 54 housing for accommodating up to 24 glass fiber ports. To ensure consistent performance and longevity, it is essential to adhere to strict technical specifications. Fiber distribution box is suitable for the wiring connection of optical cable and optical communication equipment, through the adapter in the wiring box, the optical jumper leads the optical signal, and realizes the optical wiring function. Understanding that each project has unique requirements, We offers a broad selection of options with port capacities.
