

# **Photovoltaic wiring harness junction box**

## Overview

---

A solar PV junction box is typically used in crystalline silicon or thin-film photovoltaic modules. It consists of three essential parts: the box body, solar PV cable, and solar connector. Inside, several components work together to ensure the safe and efficient transfer of power. This robust combiner box offers essential protection for your solar panels and inverters, featuring a 20A rated current fuse and a 63A air circuit breaker. With built-in safety measures like overload and surge protection, it guarantees safe operation of your solar PV system. These issues may result in reduced system efficiency, frequent downtime, or even safety risks.
