

Power Meter Battery Model

Overview

, Garmin Rally, Favero Assioma): Some use rechargeable batteries lasting 20–50 hours per charge, while coin cell versions last about 100–120 hours. Based on extensive testing, Garmin recommends the following battery types for the Vector™ 3 and Rally™ 100/200 series power meter systems. Measuring your power on the bike is one of the best ways to track your cycling progress, giving you live and recorded data on how many Watts you produce at any given time during a ride. Typically built into pedals, crank arms, or chainsets, most power meters use Bluetooth to deliver real-time data. You are able change the battery more easily and faster than ever before Do you need further help?
