

# **Price of Transformer Distribution Box**

## Overview

---

Pole-mounted or pad-mounted distribution transformers (15 kVA to 500 kVA) typically range from \$1,500 to \$20,000. Key factors are the kVA size, primary voltage, and if it uses copper windings or has special tap changers. If you don't know how much something will cost, you can pay too much or make a deal that isn't safe. Understanding distribution box cost involves examining the comprehensive investment required for electrical distribution systems that serve as crucial infrastructure components in residential, commercial, and industrial settings.
