

Price of bridge arches

Overview

A traditional fixed dental bridge typically costs between \$1,500 and \$6,500 per tooth, depending on materials and location. Zirconia dental implants are metal-free tooth replacements made from zirconium dioxide (ZrO₂) ceramic — a biocompatible, tooth-colored material used as an alternative to traditional titanium implants. VSL specializes in the design, prefabrication, and construction of precast arch bridge structures providing tailored solutions that reduce environmental impact. Each of these factors plays a substantial role in determining the final price of a bridge.
