

Price per meter of low-voltage cable tray

Overview

The average cable tray price per meter ranges from \$2 to \$25, depending on material, type, size, and surface finish. Cable trays are vital in electrical installations, providing secure pathways for power, communication, and control cables across residential, commercial, and industrial settings. Although metal pipes (conduit) may appear cheap initially, they tend to be the most costly option when the job is finally complete, since they consume a lot of time to install.
