

Senegal Power Cable Tray Construction

Overview

The project involves installing two 225 kV power cables offshore, spanning 16 kilometers each, and six two-kilometer 225 kV cables onshore, connecting Dakar's west and east coasts. French construction engineering company VINCI Energies has bagged a contract worth €200m from Senegal National Electricity Agency (Senelec) to build a range of electricity transmission and distribution infrastructure in Senegal. The project aims to improve high-voltage electrical network infrastructure in Dakar and the surrounding area. A \$205mn engineering, procurement, construction and installation (EPCI) contract to install undersea power cables in Dakar, Senegal has been inked by Eiffage and Enshore Subsea.

Senegal Power Cable Tray Construction

Eiffage and Enshore Subsea sign in consortium a EUR192

Once the cables are installed, the trenches will be backfilled, burying the cables for their protection. Two ships will be used in the works: the barge
