

Specifications of German Well Logging Optical Cables

Overview

The range of cables for direct buried installation includes all our four basic designs: concentric core, grooved core tape, DryTech and tape in loose tubes. Suitable for oil wells, gas wells, coal mines or under high temperature conditions. The cables marked with Dry; They are a series of cables in which the typical water blocking the intermediate tubes (gelatin, water swelling tape or powder) is replaced with a solid foamed thermoplastic elastomer. Permanent downhole fiber-optic cables are critical infrastructure in wellbore monitoring systems, ensuring reliable transmission of data for applications such as distributed temperature, acoustic, and strain sensing (DTS, DAS, and DSS)—all with one 1/4-in control line. In many applications, the optical fiber must be contained within a cable structure to ensure it survives the environment in which it is designed to be deployed. The FIMT can contain a range of fibers, both single mode (SMF) and multi mode (MMF). The fiber selection and appropriate filling gels can be customized to meet the customers specifications / requirements.

Specifications of German Well Logging Optical Cables

Optical fiber logging cable Special cable

Optical fiber logging cable enables the transmission of detailed data over long distances, making it an essential component in oilfield service operations. Overall, the use of optical fiber

New methods in geophysical exploration and monitoring with DTS and

Fiber-optic sensing opens up new possibilities for geophysical measurements with a broad range of applications in well logging (e.g. temperature and production logging, well integrity monitoring) and

New methods in geophysical exploration and monitoring with DTS and

We show that fiber-optic sensing opens up new possibilities for geophysical measurements with a broad range of applications in well logging and seismic exploration and monitoring.

The High-Temperature Resistant Well Logging Optical Cable

The range of cables for direct buried installation includes all our four basic designs: concentric core, grooved core tape, DryTech and tape in loose tubes. The cables are reinforced with corrugated steel

Optical fiber logging cable Special cable

In comparison to traditional wireline cables, optical fiber logging cables are lighter, safer, and less prone to signal interference. Optical fiber cables are typically used for well logging activities

Downhole Cable Experts

Cable & Product Features Cables are armored with special galvanized improved plow steel wires or special alloy wires. Tensile strength of each wire lies in the range of 270 to 330 KPSI.

Cable Logging? Optical Fiber Logging?--JASON is

Difference between Optic-Fiber logging and traditional cable logging The electrical-based sensors used in cable logging can not work continuously in

Downhole Cables

TEF cable is a key enabler of modern well management technologies. TEF cable is the sensor element for modern distributed fiber optic sensing technologies of DTS and DAS, which have become

Hybrid Electro-Optical Cable for Coiled Tubing Logging and

This new hybrid cable and its associated surface and downhole system provide a single solution for interventions, distributed measurements, and logging. Altogether, they pave the way for

Permanent fiber-optic cable

These monitoring systems help improve well productivity by identifying trends

throughout the producing life of the well, and they rely on the robust design and long-term survivability of optical cables under

Well Logging with Carina 100Xlog Fiber Optic , Silixa Ltd.

Carina 100Xlog is a high-efficiency retrievable fibre optic well logging service that visualizes entire well dynamics in real-time much more rapidly than conventional

Application of Electro-Optical Hybrid Cables in Horizontal Well

Application of Electro-Optical Hybrid Cables in Horizontal Well Production Logging
Authors: Daofan Guo, Dong Yang Abstract: For decades, well logging with coiled tubing has relied solely on surface data

SPECIALTY AND HARSH ENVIRONMENT FIBER OPTIC CABLE

Customers around the world benefit from using AFL fiber optic cable and components for downhole sensing and subsea umbilicals. With its patented stainless steel tube technology, AFL can deliver

Hybrid Electro-Optical Cable for Coiled Tubing Logging

Download Citation , Hybrid Electro-Optical Cable for Coiled Tubing Logging and Interventions , This study presents the evolution of downhole fiber optics to a new hybrid electro

Oil Well Load Bearable Detecting Cable-Well

Electro-Optic Tow Cables depths up to 6,000 meters The cable constructions are designed to endure the demands of the required tow strengths and

The Defining Series: Introduction to Wireline Logging

The first objective of logging in an exploration area is to locate hydrocarbons in a well. Next, the operating company wants to determine if

Optoelectric permanent downhole cable

The optical fibers operate independently of the electrical conductor and do not affect its reliability. The SLB optoelectric cable is externally identical to a standard permanent downhole cable and no

Downhole Logging

Rochester Cable has supplied wireline cables to logging service providers for decades. Our designs combine mechanical strength, thermal performance, and

Production logging via coiled tubing fiber optic

However, a number of shale gas wells need to be evaluated in the effects of well drilling and completion and fracturing, providing the guidance for the next fracturing design, so the production logging via

FIBER OPTIC CABLES

Optical fibers that are incorporated within these cables are used for telemetry to the tool, but can also be monitored for distributed temperature and acoustics, providing additional information for

Hybrid Electro-Optical Cable for Coiled Tubing Logging and

Abstract. This study presents the evolution of downhole fiber optics to a new hybrid electro-optical cable for coiled tubing (CT) applications. The optical fibers enable optical

Fiber-Optic Technology Allows Real-Time Production Logging Well

This paper will identify these critical factors and address proper candidate well selection and job preparation. It will also illustrate a multiwell logging campaign in the Marcellus shale, which

Downhole Cable Experts

All cable diameter values shown in the catalog are nominal and measured under 100-300 lbs. spooling tension onto shipping reel. All values have been corrected for program is

An Armored Fiber Optic Logging Cable

An ultralow stretch armored cable containing 3 optical fibers and 8 electrical conductors has been developed for use in oil well logging operations. A mating cablehead termination, optical transmitter

Bazaid et al No 1

Pioneering Well Logging: The Role of Fiber Optics in Modern Monitoring for Well Integrity

Diagnosis Abdulaziz S. Bazaid¹, Nouredine Benlakhdar¹, Vishnu Raveen², and Mohamed Sheshtawy²

The High-Temperature Resistant Well Logging Optical Cable

Adaptable para pozos de petróleo, pozos de gas, minas de carbón o bajo condiciones de temperaturas elevadas. Los cables marcados con Dry; son una serie de cables en los que la típica agua que

Fiber-Optic Technology Reduces Production Logging

The new technique uses coiled tubing equipped with optical fibers to acquire real-time measurements from the downhole logging string. The advantages of this conveyance option include

StreamLine Polymer-Locked Wireline Cable , SLB

Engineered for efficiency in all environments StreamLine(TM) polymer-locked wireline cable can be deployed in all environments to effectively address the challenges

Cable Logging? Optical Fiber Logging?--JASON is

Logging, also called geophysical logging or mine geophysics, is a method of measuring geophysical parameters by using geophysical properties such as
