

The circuit breaker keeps tripping at the distribution box socket

Overview

Your breaker may trip due to circuit overload, short circuits, ground faults, outdated wiring, or a faulty breaker. Your circuit breaker will trip once in a while if it detects an electrical fault. For facility managers, electricians, and project owners operating overseas—from industrial plants in the Middle East to solar farms in Southeast Asia—these unexpected shutdowns mean costly downtime, safety risks. If it's going off with a BANG, it's not good! The circuit breaker should have been carefully.
